

# GlaxoSmithKline

“Building Projects has created a series of fantastic work spaces. We could not have done this without them; it’s an excellent result, well done.”

Steve Taylor, Projects Supervisor GSK TTL

**Location:** Barnard Castle, County Durham  
**Project:** Enabling and refurbishment  
**Duration:** 17 weeks

## Challenge

GlaxoSmithKline is a science-led global healthcare company. Its Barnard Castle drug manufacturing site was experiencing growth and continued levels of investment to produce new products there. Building Projects (UK) was contracted to carry out the enabling and refurbishment works on its L Block upgrade due to their experience and long standing reputation for carrying out works within high care environments.

## Solution

Building Projects (UK)'s scope included:

- Full refurbishment works and enabling of the L Block upgrade.
- Strip out of existing machinery and cleanrooms
- Structural openings formed
- Fire protection
- Partitioning
- MF ceilings

- Walk on ceilings
- Specialist coatings
- Laboratory fit out
- Sealant works

## Benefits

Building Projects (UK) carried out a strict project management plan and phasing of works to ensure the minimal disruption to GSK staff during this 17 week project. Many of the areas being worked in required acoustic temporary screens and out of hours working to ensure the Health and Safety project plan was met. Building Projects (UK) are specialists in providing high quality construction solutions in the most demanding and safety conscious environments. The project was completed on time and within budget, to the delight of the customer.
