

Hadfield Dental Care

The client is delighted with the result of this project – a state of the art dental surgery for an expanding practice.

Location: Hadfield

Project: Conversion of three residential properties into a dental surgery

Duration: 28 weeks

“Building Projects (UK) has a ‘can do approach’ and are constantly looking at ways to improve and help at every stage of a development. They were professional in all aspects of their work and as flexible as possible throughout.”

Joanne Bate, Director, Hadfield Dental Care Ltd

Challenge

Hadfield dental practice had outgrown its existing premises and had secured three residential properties to convert into a bigger practice. The challenge was to take three, old terraced stone properties and convert them into a state of the art dental practice within a time critical period.

Solution

Building Projects (UK) had 28 weeks to complete a major conversion project which was achieved with exact planning and strict guidelines. The high specification works completed included:

- Electrical installation throughout
- Mechanical services
- HVAC installation
- Medical pipe lines installed
- Data cable installation
- Construction of two extensions
- Re-roofing
- New glazed façade

- Windows and doors
- New bespoke DDA compliant reception
- Data cable installations
- Full installation and commissioning of surgery equipment
- Decoration
- Flooring

Benefits

The client was delighted with the finished project and the high standard of workmanship that was apparent throughout. Time was critical for this project to ensure the dental practice could move from its existing cramped building into this purpose built practice. Five, state of the art dental surgeries have been created with a practical ergonomic yet aesthetically pleasing design. The project was completed on time and the dental practice has been able to expand and flourish as planned.
