

Arla Foods

A Nationwide Programme covering 9 locations, which was finished quicker than anticipated and within budget.

Location: Nationwide
Project: Modifications, Repairs and Installations
Duration: 6 Months

“I was very pleased with the attention to detail and the workmanship. Building Projects were a pleasure to work with and listened to our views, as we could see from the finished product. Most importantly they achieved this quicker than anticipated and under budget”

Mr Simon Hayes – Arla Foods Wythenshaw Manchester

Challenge

Arla Foods came to a decision that after a complete rebranding programme some upgrades to their sites were needed. Arla Foods chose Building Projects (UK) to manage and act on their programme of works which involved security upgrades and external works.

Solution

Building Projects (UK) worked closely with Arla Foods project teams so that the works did not effect distribution and logistics. Weekend working and careful delivery planning ensured absolute minimal disruption. Works included:

- Electrical services upgrade
- Installation of Automated Security Barriers
- Installation of Stainless steel drainage

- Supply and installation of Smoking Shelters
- Car park re-surfacing
- Modifications to Goods In Entrances
- New site signage
- Pedestrian walkways
- Armco barrier installation

Benefits

Arla’s sites are now more secure and the traffic management has improved the goods in/out road. Our works have ensured a safer environment for pedestrians and all sites are now fully compliant with smoking regulations.
