

Scotland Online

Scotland Online required Building Projects UK's expert knowledge to complete the fitting out of their new Secure Hosting Centre.

Location: Dundee, Scotland

Project: Fitting out new data centre

Duration: 12 Weeks

Challenge

Scotland Online, a regional IT solutions provider needed a multi-skilled contractor to fit out their new £1.7 Million centre. The centre needed extreme attention to detail and a high specification.

The centre was designed to allow Scotland Online to expand its high availability hosting services and offer new and existing clients reliable data security protection.

Solution

Building Projects (UK) were chosen to assist Scotland Online. Building Projects (UK) worked lengthy hours in extreme winter conditions to deliver the project on time. Works included:

- Strip out of existing offices
- Fire Protection
- Partitioning
- Raised access flooring
- Anti static flooring & coatings
- Specialist Joinery

- Suspended Ceilings
- Fire rated MF ceilings
- Excavation & formwork/concreting
- Structural openings
- Core drilling
- Emergency Generator compound
- Armco barriers
- Landscaping works
- Expamet fencing

Benefits

Scotland Online benefited from financial savings due to our hands on approach to get their new state of the art facility up and running ahead of schedule and under budget.
