

# Hologic LTD

Building Projects Group Ltd provided new clean room facility. Hologic is an innovative medical technology company with its core business units focus on diagnostics, breast health, gynecological surgical, skeletal health and medical aesthetics.

**Location:** Wythenshawe  
**Project:** Internal Fitout of a new Pharmaceutical cleanroom  
**Duration:** 14 weeks

## Challenge

The single storey clean room facility provides new ISO7 area for development of new products. Building Projects Group needed to work around the live operations of the facility while leaving Hologic with the same level of production.

As many of the machinery is operational 24/7 any down time would need to be planned with production. Air tight temporary screens and monitoring protocols would need to be in place from the start to the end of the project.

## Solution

Building Projects Group Scope of works included:

- Health and Safety Management
- Projects Management
- New Partitioning
- New Burgess ceiling
- ISO7 Clean room Construction
- IPS, cubicles and vanity installation

- Full Mechanical Works
- Full Electrical Works
- Decoration
- Testing and Commissioning
- Specialist finishes
- New GRP doors
- New epoxy resin flooring
- New access control

## Benefits

Building Projects Group managed to hand over the cleanroom on time to the delight of the client. The high-end facility was completed to the highest standard with the client using this cleanroom as a benchmark for all cleanroom across the business.

The airtight temporary screens allowed the whole facility to maintain their high levels of productivity with no hygienic compromises.

The new facility allows Hologic to expand its' business and allows for the new venture to flourish.
