Exceeding
Expectations

Constant
Communication

Minimum
Disruption

Building Projects Group provided internal fitout to a new facility. The new research and development (R&D) facility will be used to test and manufacture a non-addictive alternative to methadone, to improve patient experience on a global scale.

Challenge

The two-storey facility provides 5,000 square meters of ISO7 and ISO8 product development cleanrooms and laboratories, along with highly specified offices, meeting rooms and a restaurant for staff. Building Projects Group has a long-standing relationship with Boulting Environmental services and provided the internal construction works on this new facility. The challenge for Building Projects Group was the wide scope of works required in a tight timeframe.

Works Completed

Building Projects Group Scope of works included:

- Health & Safety Management
- Projects Management
- 110,000 sq ft of partitioning
- 55,000 sq ft of MF & lay in grid ceilings
- Fully height glazed partitioning
- ISO7 & ISO8 Clean Room Construction
- IPS, cubicles & vanity installation
- New kitchens
- Decoration
- Doors
- Specialist finishes

Benefits

Building Projects Group completed this high specification project ahead of schedule with Boulting Environmental services with the client particularly impressed with the high quality of work. Careful planning and communication together with the strict monitoring of health and safety was essential to ensure a successful completion of works. Working with Boulting Environmental services, we have achieved the highest levels of Customer Satisfaction and produced a facility with which the entire Project Team can be justly proud.
